GAME FIXED FOR 5:45 TO ACCOMMODATE THE WORKINGMEN

The baseball game this evening at the local baseball park was fixed for 5:45 o'clock more particularly, to give the workingmen of the borough and the valley a chance to see what promises to be one of the most spectacular contests on the baseball diamond since the days of the P. O. M. league.

The attraction is the fast-stepping Harmarville Consumers, an organization that won the semi-professional baseball championship of Western Pennsylvania last year. Manager D. Cleve Mathers has strengthened his lineup for the contest, but we are not informed who will draw the pitching assignment, but the inference is it will be Reilly, the Duquesne University star. We believe that Anderson will also be seen at his old position in middle field.

Pittsburgh Breaks Even With Boston At Boston Yesterday

Bill McKechnie's boys aided the boys in celebrating the battle of Bunker Hill's one hundred and forty-ninth birthday with a double bill yesterday afternoon. But the Buccaneers, after accenting the first syllable of the word battle and winning the first clash, 5 to 2, took the bunk out of bunker in the second fracas when they were whitewashed, 1 to 0.

Ray Kremer held the Boston fellows with a tight rein after the beginning of the opening struggle, and his mates came up from behind and hampered their way to victory at the expense of James Yeargin. Tim McNamara was the hurling hero of the shutout affair his opponent being Lee Meadows.

The Pirates collected nine blows in the first fray and the Braves were limited to six. The same figures told the story of the other affair but in that instance they were reversed and Pittsburgh folded up into the old slump while the foe accumulated the nine smacks. Kremer was touched for all the Boston blows in the first three frames, four being clustered in to the second round when both runs were charged up and this left the Braves one point to the bad. The big Californian then tightened up and did not permit one of the last 19 batsmen who faced him to reach the paths. The Pirates deadlocked the count in the seventh and settled the first engagement in the ninth.

MARINES CLEAR DECKS, ACTION ON BONUS

Washington, June 8.—Swift handling of the Adjusted Compensation claims of approximately 80,000 U. S. Marines or their beneficiaries is promised by the Marine Corps.

Blanks upon which to make application for bonus, with sheet of instructions and envelopes for forwarding application, are now in course of printing and will be forwarded in the near future direct from the Government Printing office to post offices, patriotic societies, and recruiting offices of all branches of the service.

The clerical force handling this work will be limited and the rapidity with which applications will be received and disposed of, i. e., certified by the Bureau, for the issuance of the Adjusted Compensation Certificate will be retarded should a large amount of unnecessary correspondence be received.

Each application for bonus will be acknowledged upon its receipt, and the applicant will also receive another notice when the Marine Corps completes its action and forwards the application and certificate to the U. S. Veterans' Bureau.

Deaf Cats

A peculiarity of deaf cats is that they seem to have a very great sense of feeling in their feet-pads. It is almost an impossibility for a heavy animal to approach a deaf cat from behind without giving it warning, and this may be attributed to the extreme sensitiveness of the cat's feet recording the slightest tremor of the ground.

A Tasteless Confection

A little girl whose sister was about to be married was handed a package of confection, but she was rather young to understand its proper use. Ten minutes later she came to her father with tears in her eyes. "It isn't good at all, daddy," she said; "it hasn't a bit of taste to it!"—Boston Transcript.

Volcano Traps Woman

Although thousands of visitors get more or less within stone's throw of the cone of the crater of Mount Vesuvius annually with being injured, one death was recently reported of a woman who went too near and was caught by a sudden belching of hot lava.

Had a Good Start

It was raining and two boys were trying to hit upon a game that might suit the circumstances. One said to the other: "I know, Alf. Let's see who can make the ugliest face." "Garn!" said the other, "look at the start you've got!"—Pearson's Weekly.

Tomb of Virgil

The tomb of Virgil is to be purchased by the government of Italy. The surrounding plot, transformed into a garden of the Greco-Roman style, with laurel, myrtle and roses, will become a shrine for lovers of the poet.

Make Allowance for Wind

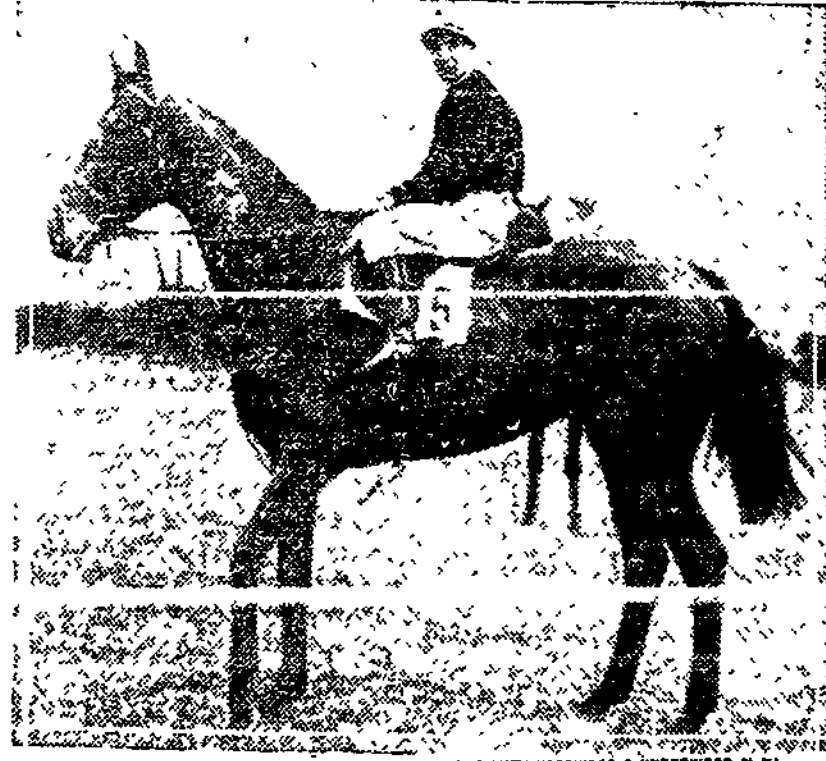

Allowance must be made for a wind of about seven miles an hour from the west at the average altitude used in the transcontinental mail service flights of the United States post office department airmen.

"Lo the Poor Indian"

The expression, "Lo the poor Indian," is from Alexander Pope's "Essay on Man." It occurs as follows: "Lo, the poor Indian! whose untutored mind sees God in Clouds, or hears him in the wind."

First Woman Conductor

In recent years many women and girls have been employed as elevator conductors, but twenty years ago the only elevator girl in the world was Miss Margaret Donnelly, of New York city.

DERBY WON BY EARL OF DERBY

Jockey Weston on Sansovino, the Earl of Derby's horse which Weston rode to victory in the classic of classics, the Derby, on Epsom Downs. The son of Swynford-Gondolite is the first Derby winner owned by a titular descendant of the peer who founded the race to win the classic in the past 137 years, the last previous Derby-owned horse to win being Sir Peter Teazle, owned by the present Earl's great-great-grandfather, winner of the eighth Derby.

LABOR CONDITIONS SHOW DECREASE

New York, June 18.—Employment decreased 5 per cent during April and the average working hours dropped 30 minutes a week, according to figures of the National Industrial Conference board.

Earnings of workers during the month dropped from 56.1 cents an hour to 56 cents. Out of 23 industries 15 report decrease in cases, seven increases and one reports no change. Lumber and mill work was the only class in which a noticeable increase occurred.

Marked declines in employment were reported in the following industries—agricultural implements, automobile, boot and shoe, chemicals, cotton manufacturing, meat packing and silk. Only three industries showed increases.

Annuities Were Issued in Early Babylonian Times

Historically annuities antedate life insurance by far. It is thought that the great development of banking facilities in Assyria and Babylonia must have provided annuities. The first annuity was issued in 4000 B. C. in Rome, and is of such a character as to justify a belief that they had been long in use.

In the Middle Ages, kingdoms, municipalities and bankers obtained money by selling annuities for life or terms of years. It is said that England's national existence during the wars of William of Orange was largely maintained through the money obtained by selling annuities. At first the values of such contracts were determined without scientific calculation; after a while the Northampton mortality table was compiled and used as a basis, and later the Carlisle table, but both these bases were far too favorable to the annuitants.

Several British companies took advantage of the very low price at which their government granted annuities and purchased many on the lives of sturdy farmers, but payable to their corporate selves, and thus made large profits. In 1819 an English actuary warned the government that it was losing £8,000 a month but it was not heeded until 1827, when another actuary announced that the government was losing £4,000 a week, and then the sale of annuities was stopped after an estimated total loss of £25,000,000.—World's Work.

Why Blinks Had to Reach Home on Schedule Time

Promptly as the office clock struck five Blinks with unusual rapidity prepared to start for home.

As he rushed into his overcoat and made for the door his desk mate raised a surprised head. "What?" he said, "In a hurry again tonight? It's six nights now you've rushed home like this and haven't waited for a soda at the old stand. I'm beginning to think I've offended you, or something like that."

"No," Blinks laughed. "You haven't hurt my sensitive soul, but the fact is this, we've got a cook up at the house now, and while the missus didn't mind my rolling in late the cook won't stay unless I arrive every evening on time."

The First Are Last

For hundreds of years the Chinese have been skilled iron workers—the first in the world—but have imported all their steel. The first electric steel furnace has recently been installed at Shanghai, in the first steel foundry to be operated in the celestial kingdom. Its inauguration marks a new industrial era for China.

Where Leprosy Started

Leprosy had its origin in Central Africa and thence it spread to Asia. The hordes of the army of Darius brought it to Europe and it was taken to the Americas as an accompaniment of negro slavery, according to a writer in the London Quarterly Review.

Superstitions in Breeding

The same superstitions on which the shepherds of Asia based their practices of animal breeding at least thirty centuries ago are still widely current, while the one sound principle known to the ancients, selection of the best for breeding stock, is still widely neglected.

Odd Employers

Varied are the idiosyncrasies of employment managers, those individuals who sometimes hire a man because they like the shape of his jaw or the color of his eyes. One employer has a plan which he thinks is unique. "I have two doors in my office," says he. "One is marked 'Pull' and the other 'Push.' When the interview is concluded and the applicant told to call the next day for final decision, only those who use the door marked 'Push' are considered."

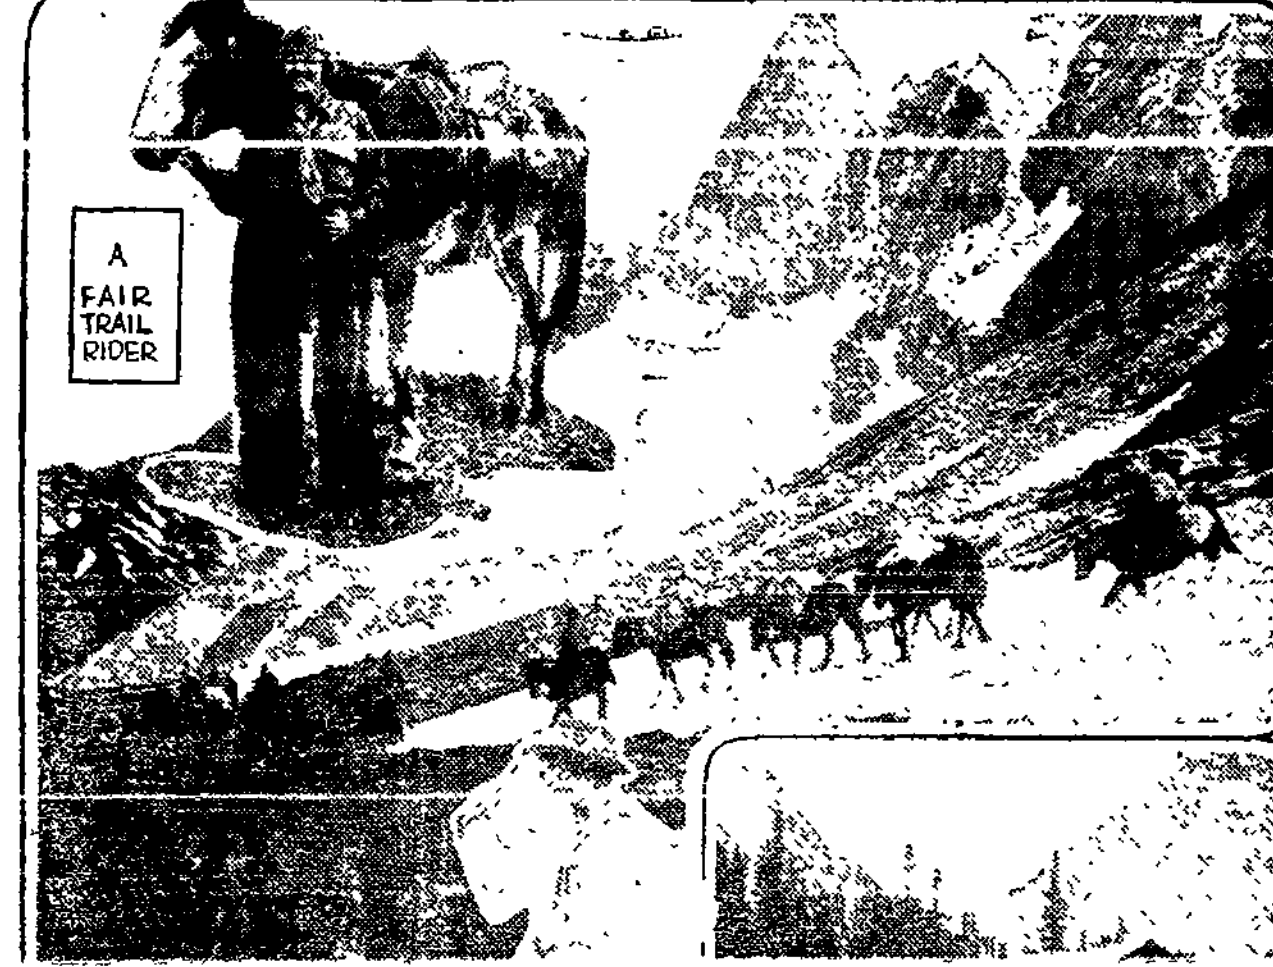

Leaflets on Stalks

The box-elder, or ash-leaved maple, is to be distinguished by its ash-like leaves of three to five leaflets on a single stalk, coarsely toothed and usually deep green, says the American Tree association of Washington, D. C. The bark on the trunk resembles that of the ash, and is light brownish green. The young twigs are a light olive green.—Nature Magazine.

The Bulrushes

Opposite Cairo lies the island of Roda, where, according to Arab tradition, Pharaoh's daughter found Moses in the bulrushes. At the southern extremity of this island is the Nilometer, by which the rise of the Nile has been measured by the Cairenes for 1,000 years. It is a square well with an octagonal pillar marked in cubits in the center.

Trail Riding Is 1924 Innovation In Canadian Rockies

TRAIL RIDERS CROSSING WOLVERINE PASS

IN CAMP

July of this year witnesses the first annual Pow-Wow of the Trail Riders of the Canadian Rockies in Yoho Valley, the wonder valley of Canada's mountain playground, and marks another outdoor recreation made available to visitors. Last year a group of outdoor lovers made an initial trail ride and found it so fascinating that they decided to form an organization to foster riding in these mountains. Any one who has established a record for riding in the Canadian Rockies of fifty miles or more, is eligible to membership, irrespective of race, creed, sex, age or color.

Dr. Charles Walcott, secretary of the Smithsonian Institution at Washington, D. C., is honorary president of the new Order, and John Murray Gibson, novelist of Montreal is the honorary secretary. Among the members of the organizing committee are such prominent individuals as H. B. Clow, president of Rand, McNally & Co., Chicago; Reginald Townsend, editor of "Country Life," Garden City, N. Y.; Captain A. H. McCarthy, U. S. N., of New Jersey and Wilmer, B. C., a celebrated mountaineer, and Col. W. W. Foster of Vancouver, B. C., president of the Alpine Club of Canada. The spirit of the Order shall be a reverence for the majesty and beauty of nature. Its aims are to encourage travel on horseback in the Canadian Rockies; to foster the maintenance and improvement of old trails; to advocate and practice consideration for horses and to promote the breeding of saddle horses suitable for high altitudes; to foster good fellowship among those who visit and live in these glorious mountains; to encourage the love of outdoor life, the study and conservation of birds, wild animals and alpine flowers; to protect the forests against fire; to assist in every possible way to ensure complete preservation of the National Parks of the Dominion of Canada. The spirit of the Order shall be a reverence for the majesty and beauty of nature. Its aims are to encourage travel on horseback in the Canadian Rockies; to foster the maintenance and improvement of old trails; to advocate and practice consideration for horses and to promote the breeding of saddle horses suitable for high altitudes; to foster good fellowship among those who visit and live in these glorious mountains; to encourage the love of outdoor life, the study and conservation of birds, wild animals and alpine flowers; to protect the forests against fire; to assist in every possible way to ensure complete preservation of the National Parks of the Dominion of Canada. A GUARANTEED REMEDY FOR PILES

Go to Hennings' today, hand them 30c and say, "I want a jar of San Cura Ointment" and if you aren't satisfied—your money back.

"For twenty years I suffered with bleeding and itching piles; at times I was confined to the house for more than a month. Two years ago I began using San Cura Soap and ointment and one 60c jar made a firm and permanent cure. I have not been troubled since."—Rev. W. F. Gilbert, Titusville, Pa.

It draws out poison; that's the secret of the wonderful success of San Cura Ointment; that's why it so quickly heals scalds, burns, cuts, bruises, and eczema. It's best to use San Cura Soap at all times; it is a great aid in banishing pimples, blackheads and the germs of disease. 25 cents at Hennings' Drug Store.

NOTICE IS HEREBY GIVEN that application has been made to The Public Service Commission of the Commonwealth of Pennsylvania under the provisions of The Public Service Company Law by West Penn Power Company for a Certificate of Public Convenience evidencing the Commission's requisite approval of a contract between said company and the Borough of Charleoi, Washington County, for lighting the streets, alleys, highways and public places in said Borough.

The public hearing upon this application will be held at the rooms of the Commission at 112 Market street, Harrisburg, Pennsylvania on Tuesday, June 24th, 1924, at 9:30 a. m. Standard Time, when and where all persons may appear and be heard if they so desire.

Fine Architecture in Picturesque Old City

On the bumpy, incredibly leisurely line from Chartres to Rouen is the city of Dreux, by no means unknown to architects, and quite deserving of a visit from them, if only for its old houses and its four notable "monuments historiques," says a writer in *Saturday Magazine*. Of these latter, the superb belfry of the old hotel de ville stands forth as one of the finest in France. From the east its well proportioned profile is in harmony with the simplicity of that facade, and from the west, towering up at the end of the Grande Rue, there is just that choice of ornament to endow it with a restrained richness and a sense of excellent scale. The Gothic tracery patterns are especially free and lovely.

A good snail's journey away is the yellow stone form of the Eglise St. Pierre, a product of those interesting periods when the late Gothic and the early Renaissance arts were mingling together. One of the towers is complete, very clear cut and fine, while the other for some reason was stopped abruptly, and remains untouched and unadorned, presenting a strange outline of unfinished piers against the sky.

Of an entirely different character is the Echo des Jeunes Filles, alias the Tribunal de Commerce, alias the Hotel de Dieu, a sixteenth century huge blue slate roof and sporting a curious iron ribbed rose window. The simplicity of its mass is very splendid; but this seems insufficient to attract any "ohs" or "ahs" from passing tourists.

"Shirt of Nessus"

Told of in Old Fable

"The shirt of Nessus is a phrase used to describe the toitures of remorse. According to one version of an ancient legend it was a gorgeous, gold-embellished garment given to the wife of Hercules by a centaur who hated him. With it he gave the advice that if ever she found her husband's affection waning she should persuade him to don the shirt, when his love for her would return.

Years passed, and Hercules, after the fickle fashion of mythical heroes, grew tired of his wife. She thereupon be thought herself of the centaur's gift, which she begged her husband to wear, says London Tit-Bits. He put it on, only to find that it burned and tortured him, and finally caused his death, for he built a great funeral pyre, laid himself upon it and bribed a friend to fire it rather than endure the torments of the shirt, which clung to his body and could not be removed.

A centaur was a legendary creature with the body of a horse and the arms and head of a man. Therefore if we say of a horseman that he sits his horse like a centaur we mean that he rides so perfectly that he and the animal seem to be one.

Indians' Steam Bath

The sweat bath has been used by the Sioux and other Indians of the Northwest for generations. The framework of the bath closet is made of limber willow sticks, over which are thrown blankets and skins anchored with heavy stones.

In a hole in the center of the both are white hot stones, on which the bather splashes cold water to make steam. Periodically he drinks cold water to induce perspiration. In the meantime the bather lashes his body with a bundle of tightly-bound straw.

After thirty minutes of this he runs to a stream and plunges into the cold water. For soap the Indian uses fine mud at the bottom of the stream. A twenty-minute sunning completes the semi-weekly bath, says Chief Buffalo Child Long Lance in the Mentor magazine.

Famous Old City

Venice ranks high among Italian cities in its supply of picturesque nicknames. The commercial center of the world in the Middle ages, Venice has been known as "The Bride of the Adriatic" and the "Queen of the Adriatic." To this day tribute is paid by Venice with elaborate ceremonies to the Adriatic, whose placid waters take the place of streets and bear upon their bosom the trade and life of the city. Venice is known also as "The City of St. Mark," after its patron saint, and as "The City of the Lion," an allusion to the great winged lion in front of the cathedral, holding in its paws the gospel of St. Mark.

Earth's Central Core

Studies of varying velocity of earthquake tremors passing through the interior of the globe led Professor Wiechert of Holland to conclude that the earth consists of a central core of iron or steel, about 5,500 miles in diameter, surrounded by a stony shell nearly 1,000 miles in thickness. Between the outer solid rind and the inner layer of rock covering the metallic core, he thinks there is a layer of liquid or plastic material a little less than 20 miles below the earth's surface.

Explaining Battleground

"Boy, is this the field on which the great battle was fought?" asked the tourist.

"No, sir; that be at the top of the hill," replied the native boy.

"Dear, dear!" exclaimed the tourist; "that must be a mile away. Why didn't they fight it in this field?"

"I suppose because this 'ere field belongs to Farmer Johnson. He never would lend his field for anything, not even for the village sports."

Danger in Reading on Conveyance in Motion

Abstaining from reading in the subway is one way to prolong life, according to Dr. Frank J. Monaghan, commissioner of public health for New York city. Take a look around any subway car, he says. Scarcely one person in five is not reading. Almost as many newspapers as passengers enter at each station. These papers are read closely, palpitatingly, by the holder, sitting, standing or wavering with the motion of the car.

"Every time the train lurches or jerks many tiny muscles are kept busy adjusting the eyes to the vibration," he explained to the New York Times. "This is why it is injurious to use the eyes on a conveyance in motion. Also, the lighting is apt to be extremely poor. If this sort of thing is kept up eye strain and possibly nerve strain will result. Blurred vision may follow; and in the course of years the eyesight may be seriously impaired."

"But the actual injury to the eyes is not the whole story. Few persons realize how the eyes are tied up with the rest of the body and the rest of the body on them. Eye strain will start the vicious circle. It induces fatigue, possibly a headache, and lowers general vitality and efficiency. If people would only look out for such seemingly minor details as these they would raise the general health standard of the city."

Big Man Takes Chances

Picking on Little One

There is an old western saying that "Mr. Colt has made all men equal"; something the Constitution couldn't do.

The best application of this aphorism I ever heard was when word was brought to a small man that an enemy, six feet two and weighing about a hundred and eighty pounds, had registered a vow to knock him down the next time he saw him and stamp out his teeth with the steel-shod heels of his cowboy boots. The little man, unperturbed, looked up at the messenger "You like So and So?" he asked.

"Yes."

"Good friend of his?"

"Yes . . . What're you driving at?"

"Well, tell him he's done the most dangerous thing a man can do—he's threatened a little man. Tell him the next time to pick out a man exactly his own size. More big men have died because they've threatened little men than from any other cause."—Strathers Burt in the Saturday Evening Post.

Cause of Echo

An echo is the repetition of a sound due to its reflection from some distant surface, such as from a building, cliff, cloud or body of water. It must be remembered that sound is transmitted by means of waves through the air. Sound travels very slowly in comparison with light or radio waves. In ordinary air sound waves travel at the rate of about 1,000 feet a second. Now suppose a person is standing 1,000 feet from a reflecting surface such as a hill or cliff. It will take the sound waves set in motion by his voice one second to reach the cliff and it will require the same length of time for the reflecting sound waves to return to the human ear. Therefore two seconds will elapse between the time he shouts and the time he hears the echo of his voice. Repeated echoes are due either to independent reflections of sound from bodies at different distances or to successive reflections.

Billions of Buttons

There are 20,000,000,000 buttons manufactured in this country annually, and the industry has grown to such proportions that it equals, in dollars invested, and value of products, the cutlery industry or the manufacture of oilcloths and linoleum. America has almost a monopoly on the manufacture of vegetable ivory buttons, which are made in enormous quantities from the togua nut. This nut grows plentifully in the northern part of South America and in Panama, and provides the greater part of the buttons used in men's clothing. If all the buttons made in a year in the United States were distributed equally among the population each man, woman and child would receive 152, with a few thousand left over for good measure.

"Seward's Folly"

Probably the phrase "Seward's Folly" applied to Alaska will indicate as well as any words can the attitude of the people toward the purchase of Alaska. American histories fail to emphasize the fact that this government purchased the territory called Alaska as an appreciation of the support which Russia gave to the federal government during the Civil war. It seemingly was an unwise investment, for at the time of the purchase the public was not aware of the enormous mineral wealth to be found in the territory.

Atlantic Airlights

The first Transatlantic flight was made by the United States naval seaplane N-C-4, in charge of Lieut. Com. A. C. Read. The other members of the crew were Lieuts. E. F. Stone and Walter Hinton, Radio Operator Ensign H. C. Rodd, Engineer Chief Machinist's Mate E. S. Rhoades. All were Americans and ended May 31. The total flying time from Rockaway, N. Y., to Plymouth, England, was 57 hours and 16 minutes.

Gold at Earth's Center?

The way in which earthquake waves travel through the earth helps scientists to form a hypothesis of the composition of the earth many miles below the surface. At best, drills and shafts will reach only a mile or two into the interior, but vibrations set up by immense slips in the crust indicate the nature of rocks to a hundred miles below the surface. The effect of tides on the earth taken in conjunction with its weight makes it probable that the core of the earth is made of heavy, dense and elastic metal, probably iron, with perhaps fabulous deposits of gold and platinum at the center.—Current History Magazine.

Clutching at God's Reins

What discord should we bring into the universe if our prayers were all answered? Then we should govern the world, and not God. And do you think we should govern it better? It gives me only pain when I hear the long, wearisome petitions of men asking for they know not what. As frightened women clutch at the reins when there is danger, so do we grasp at God's government with our prayers. Thanksgiving with a full heart—and the rest silence and submission to the divine will!—Henry Wadsworth Longfellow.

A Clipper's Sails

Another sailor worth taking a voyage for is that of the sails by moonlight. Our course was "south and by east, half south," so that we seemed bound for the full moon as she rolled up over our wavering horizon. Then I used to go forward to the bowsprit and look back. Our ship was a clipper, with every rag set, stunsails, skyscrapers, and a . . . Was it easy to believe that such a wonder could be built of canvas as that white many-storied pile of cloud that stooped over us or drew back as we rose and fell with the waves.—Lowell.

W. T. Lane, Attorney.

NOTICE

Notice is hereby given that application has been made to The Public Service Commission of the Commonwealth of Pennsylvania, under the provisions of The Public Service Company Law, by Alfred B. Martin, Tough House, Connellsville, Pennsylvania, for a Certificate of Public

Convenience evidencing the Commission's approval of his right to operate motor vehicles as a common carrier for the transportation of persons between Connellsville, Fayette County, and Charleoi, Washington County; and for an extension of renewal of certificate of Public Convenience, No. 6699, heretofore issued. A public hearing upon this application will be held in City Court Building, Seventh floor, Pittsburgh, Pennsylvania, on the twenty-fifth day of June, 1924, at 8:30 a. m. o'clock. Standard time, when and where all persons interested may appear and be heard, if they so desire.

Albert B. Martin.

Such popularity must be deserved

WHETHER it's tennis or cigarettes or anything else, popularity is no stroke of luck. No champion ever held his laurels except by making good. No cigarette ever held popular favor except by deserving it.

The popularity of Chesterfields is an outstanding example. For months now they have been drawing over 1000 smokers a day away from other cigarettes. Surely this is proof of their quality and good taste.

THE "MAKER OF PRESIDENTS"

A page advertisement in the New York Times announces in "display" type that "Colonel" George Harvey, late Ambassador to Great Britain, has assumed editorial direction of the Washington Post and will write exclusively for that Journal. According to the advertisement, this is "an event of outstanding political importance," for "Colonel" Harvey "has been called 'maker of Presidents,'" his political sagacity and foresight "having contributed largely to the nomination and election of Presidents Cleveland, Wilson and Harding"—two Demo-

crats and a Republican in turn. Of course the page advertisement omits to mention the story that Candidate Harding feared a man steeped in victrol and bought its support with the promise of the post to Great Britain. Nor is there any mention of the story that because Candidate Wilson declined to give the same promise his former supporter turned upon him and persistently poured editorial vitals of wrath upon his head. In his first utterance in the Washington Post "Colonel" Harvey tilts against several Republican statesmen and leaves them considerably bruised about the head. In connection with Japanese exclusion and Mr. Haninara's "error" in mentioning "grave consequences" as a probable result, the "Colonel" says Mr. Hughes "blundered" in sending the Hanilara letter to the Senate without first seeking to have it modified, that Senator Lodge "gratified his exquisite taste for meticulous diplomatic expression" by making use of the words to foment trouble, and that another distinguished New Englander is a "mischievous Moses." Mr. Coolidge is not mentioned—yet. But perhaps he is expecting to be, for it is reported that he and the "maker of Presidents" have failed to "hit it off." The "Colonel" is for no party or man—except Harvey—and for a widespread impression that bloody heads are apt to decorate the political firmament when he fails to get what he wants.

PROTEST BY "HARIKIRI"

The "solenn protest" against Japanese exclusion in the immigration bill which Japan has laid before our government, is understood to be no more than an expression of hurt national dignity. It is not a threat and it is said that in neither country is there any expectation of serious trouble as a consequence, for Japan is not so much a nation as a collection of unquiescent right under the law or nations and is bound to admit just as the International Court would be certain to decide that the control of immigration is purely a matter of domestic law. But there was another even more solemn protest that undoubtedly caused a great sensation in Japan and will largely contribute toward the growth of ill feeling. We refer to the "harikiri" suicide of a Japanese citizen in front of the American Embassy in Tokio.

Though regarded lightly in this country, the incident was important and met approval in Japan, harikiri being regarded as a noble act that sets unseen forces in motion. Though originally committed only by doomed men at the invitation of the Mikado, it now seems to be the voluntary resource of the wronged who expect to get revenge upon their enemies by returning in spirit to haunt and afflict them, apparently the Jap who committed harikiri in front of the American Embassy believed that he could and hoped to bring misfortune upon the United States from another world, and the accounts indicate sympathy with such an aim among the credulous Japanese masses.

An Ill Omen

Among some German peasantry, should a mother lose the heel of one of her shoes, she takes that to be a sign that one of her children will die before the year is out.

Using Up Waste

Balsam wool, a heat-retaining material, is made of the fibers of the pine and other coniferous trees the pieces of which are too small to have other commercial value.

Expressing a Rain

Willy (at philharmonic concert, testily)—"I'm always hearing 'The Afternoon of a Faun.' For heavens' sake, what did he do with his evenings?"—Musical Courier.

Count Dust Particles

A count of the dust particles found in air at the top of Washington monument has been made by the United States weather bureau every day for the last year.

THE OFFICE CAT

No wonder Germany is broke. She is trying to sell cotton stockings in this country.

Clothes do not make the woman, but they make all the women sit up and take notice of her. Isn't that enough.

In Washington it appears that all the easy money comes oiled.

Another thing which hampers love in the spring is young onions.

In Monessen the other day a subscriber called on the editor and said he was dashed blanked tired of all this senate investigation and he'd stop his paper if the editor didn't quit printing it. A few minutes later another subscriber asked why the editor didn't print the entire proceedings. And they wonder why sometimes an editor perches on the fence.

Slippery ice—very thin, Pretty girl—tumbled in, Saw a boy—on a bank, Gave a shriek—then she sank, Boy on bank—heard her shout, Jumped right in—helped her out, Now he's her's—very nice, But she had it—break the ice.

YOU MEAN?

Through rather close personal experience and constant perusal of newspapers and magazines during these modern days, we have arrived at the following conclusions:
1. When a diplomat says "Yes," he usually means "Maybe."
2. When a diplomat says, "Maybe," he most often means "No."
3. When a diplomat says "No," he isn't a diplomat.
4. When a lady says "No," she's apt to mean "Maybe."
5. When a lady says "Maybe," she almost always means "Yes."
6. When a lady says "Yes"—well, she just isn't a lady.

Correct this sentence: It was so late, and she said I could sit on it before it was bobbed.

The prophet, honored abroad, is regarded as a nut in the old home town.

About 10 plates were laid and at each plate was a knife and fork.—Paxton, Ill., Register. Why the folks?

ASK DAD; HE KNOWS. Take a tip from father. Although it causes pain—Fall in love with pretty girls. But marry one that's plain.

Horse sense is more reliable than horse shoes.

This here box of candy and them roses you brought me last night, said Gladys to her lover from Donora, is only a partial explanation of why you was out with another Jane last Monday night.

Good folks have been scarce ever since God created Adam and Eve.

Advice in Success: Barrel says "Never lost your head." Glue says "Stick to a good thing." Ice says "Keep cool." Hammer says "Do a driving business."

"Let's go" is a pretty poor slogan if you don't know where you're going.

New York is the city of opportunity. A man who went there broke owes \$202,005.55 now.

Physician Surprised.

"Hearing of some good results from the use of May's Wonderful Remedy, I decided to try it on a chronic case of indigestion and gas-tritis I was interested in. After the first dose the patient was relieved of gas trouble and was soon able to eat radishes and things he had not eaten in years." It removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded at all druggists.

First Fog Signals in U. S.

Development of the radio compass for the first time made possible the taking of accurate bearings effectively at a considerable distance during a fog, but guns, fired occasionally, were the first fog signals used in this country.

Largest Waves.

From a series of observations made of waves of the Atlantic, Pacific and cer, it was found that the largest waves occurred in the Indian ocean, where thirty different waves averaged 20 feet, the largest being 37 feet.

Like All the Rest.

A terrible tragedy is reported from Suburbia. It appears that a lady recently wrote to an evening paper to say that she, at least, had found the perfect husband. Unfortunately, her letter was never published, as the gentleman in question forgot to post it.

Variety of Particles Gathered by the Eye

Few people have never experienced the pain or discomfort that comes of getting dust particles of other foreign bodies in the eyes. Few, it is safe to say, realize the true source of some of these irritating obstructions.

Tell the average person it is possible to collect in the eyes the dust of a falling star and you will probably be disbelieved. Yet microscopic examination has shown this to be a fact. When a meteor reaches our atmosphere it discharges heavy vapors, which condense into myriads of minute particles, any one of which may lodge in the eye that is gazing skyward.

Volcanic eruption may cause discomfort in a similar fashion. Lava flowing from an active crater gives off clouds of vapor containing microscopic particles that make their way round the world in the upper air currents, ultimately to fall in showers upon the earth, where wide-open eyes may easily collect them.

Again, the great deserts contribute largely to the number of foreign bodies gathered in this way. Sandstorms do not cease from troubling immediately they subside. Their particles are borne by the winds the world over, many of them finding lodgment in our eyes, as the microscope has repeatedly proved.

Coming from the big pine forests of Canada may affect us in like manner, while an even more strange, though not less potent, cause of this special form of irritation is the scales of butterflies' wings, shed as a rule during the first flights after emerging from the pupa.

The sources and variety of things gathered in the eyes during a normal lifetime are, in fact, amazing and form an astounding commentary on the disintegrating forces unceasingly at work in the universe.

Explaining the Real Function of the Mind

Mind was not created for the sake of discovering the absolute truth. The absolute truth has its own intangible reality, and seems to be known. The function of mind is rather to increase the wealth of the universe in the spiritual dimension by adding appearance to substance and passion to necessity, and by creating all those private perspectives, and those emotions of wonder, adventure, curiosity, and laughter which omniscience would exclude. If omniscience were alone respectable, creation would have been a mistake. The single duty of all creatures would then be to repair that creative error by abolishing their several senses and desires and becoming indistinguishable from one another and from nothing at all; and if all creation could attain to this sort of salvation, the absolute substance, in whose honor all else had been abandoned, would become unconscious. The time will doubtless come for each of us, if not for the universe at large, to cease from care; but our passage through life will have added a marvelous episode to the tale of things; and our distinction and glory, as well as our sorrow, will have lain in being something in particular, and in knowing what it is.—G. Santayana in Yale Review.

Place at the Top

Andrew Carnegie said: "I would not give a fig for the young man in business who does not already see himself a partner or the head of the firm." Do not test for a moment in your thought of yourself as a clerk, foreman or manager, in any concern, no matter how big it is. Say to yourself each day, "My place is at the top." Be king in your dreams. Vow that you will reach the position you long to attain with untroubled reputation, and make no other vow to distract your attention. No matter what business you may be in, your prime ambition should be to attain high water marks. The love of excellence is the star that leads the world onward.—Inspiration.

Getting Pointers

An elderly colored man had been noticed hanging around the seal tank in the zoological park of a Southern city. He appeared to be worried. The superintendent didn't know what he was up to and was rather afraid that the man intended to commit suicide. Finally the superintendent asked him point-blank what it was all about.

"I don't mean no harm whatever, boss," was the earnest reply. "But I needs some pointers and I needs them bad. You see, sub, I jest lined a holze and I been elected grand keeper of the seal."

A Huge Topaz.

A topaz, 10 by 17 inches, weighing about 160 pounds, has been sent to the Field Museum of Chicago, by a gem hunter in Brazil.

In a Way.

Missionary—"And do you know nothing whatever of religion?" Cannibal—"Well, we got a taste of it when the last missionary was here."

No Limit to Vanity.

There is no limit to the vanity of this world. Each spoke in the wheel thinks the whole strength of the wheel depends upon it.—H. W. Shaw.

SPEERS

Mrs. Shirley Griffith was a caller in Pittsburgh on Thursday.

Mr. and Mrs. John Hatfield motored to Uniontown on Sunday.

Miss Gladys Bowers is spending several weeks visiting in Beaver Falls.

Miss Betty B. Beazell of Vesta spent Thursday visiting with friends here.

Mrs. Thompson of Tarentum is spending several days visiting James T. Heffran.

Mr. and Mrs. George Andrews and children were callers in Scenery Hill on Thursday.

L. T. Jackman of Brownsville was a caller at the home of Mrs. T. J. Jackman on Saturday.

George Andrews and Stephen Speers were business callers in Monessen on Wednesday.

Mrs. Eliza Hands of Bentleyville was a caller at the home of Mrs. E. P. Walters on Saturday.

Mrs. E. J. Tuttle of Monongahela, was a guest at the home of Mr. and Mrs. William Lax on Thursday.

Katherine Beazell of Pittsburgh spent Sunday visiting at the home of Mr. and Mrs. James T. Heffran.

Mr. and Mrs. Edward Bickerton of Charleroi were callers at the home of Mrs. Harriet Sneed on Sunday.

Mr. and Mrs. Cary Ullum of Centerville spent Sunday visiting at the home of Mr. and Mrs. James T. Heffran.

Mrs. Boyd Montgomery and children were guests at the home of Mr. and Mrs. Harry Shelton of Belle Vernon.

Mrs. Joseph Davenport spent Sunday visiting at the home of Mr. and Mrs. Anthony Davenport of Pricedale.

Mr. and Mrs. Boyd Montgomery and children spent Sunday visiting at the home of Mr. and Mrs. William Carson of Long Branch.

Mr. and Mrs. Carson Thomas and children of Moscow, Maryland are spending several days visiting at the home of Mr. and Mrs. Gilbert Greene.

Mr. and Mrs. George Greene have returned home from Pittsburgh, where Mr. Greene has been a patient for some time. Mr. Greene is rapidly recovering.

Alvin Greene, David Lauder and son, George of Lonoconing, Maryland, are spending several days visiting at the home of Mr. and Mrs. George Andrews.

Mrs. Edna Zimmerman and Mrs. Jessie Hammond of Detroit, Michigan, have returned to their home after having spent some time with their brother, S. L. Griffith.

Misses Mildred Bickerton and Thelma Andrews of this place and Mrs. Mary Thomas of Moscow, Maryland, were guests at the home of Mr. and Mrs. Emerson Beale of Belle Vernon on Sunday.

Rev. and Mrs. H. N. Clark, daughter, Iphigene Mae, Misses Elsie Sneed and Ruth Walters, attended the Washington District Epworth League convention held in Homestead M. E. church on June 11, 12 and 13.

Miss Margaret O'Brien and Leo O'Brien of Lock No. 4, spent several days visiting in Elizabethtown and were accompanied home by Miss Margaret C. Chalfant of this place, who has been a student in the Elizabethtown College for the past six weeks.

Mr. and Mrs. J. H. S. Chalfant and daughter, Marjorie, left recently to spend the summer with Mr. and Mrs. Harvey Chalfant of Buckingham, Kansas, and also with Mr. and Mrs. J. H. Crow of Pueblo, Colorado.

Mrs. Ruby Chalfant and daughter Margaret, Miss Myrtle Beazell and Thornton Dauthitt, motored to Snowden on Sunday.

Children's day was observed in the M. E. church on Sunday, June 15. A very successful program was carried out, consisting of recitations, and songs. The participants were the boys and girls of the Primary department, and Junior class, with Miss Eunice Cowell at the piano. The church was tastefully decorated with ferns and flowers.

Good and Bad Luck Connected With Cats

Many are the superstitions connected with the sleek domestic cat. Even cat haters will not turn the putting black tom from their doors, for they know the good luck he brings, not will they dare to afflict him because of the bad luck that will inevitably follow.

Should he saunter across her path as she leaves the church on her wedding day, rubbing his head against her satin gown, the bride, however much she may dislike him and however grimy he may be, will welcome his attentions and rejoice at the happy omen of good luck in store for her. Another cat superstition is that he must not approach a sleeping babe's cot or there will be trouble, and another that if a cat sneezes some one in the house will be ill.

To dream of a cat means that one's friends are false. Treachery is afoot. But if the animal is yet a young and playful kitten the meaning is reversed and powerful friends are watching over the dreamer.

Those who believe the superstition that the spirits of witches dwell in black cats should be very careful to resist the temptation of throwing water over the night warblers on the roofs; for it is said that witches in the shape of black cats roam over the rooftops. It is truly dangerous to offend a witch—seven years' bad luck!

Real Petrified Forest in Northern Arizona

The petrified national forest, one of the twenty-nine national monuments established by presidential proclamation, is the only region of hundreds of places in the Southwest in which silicified wood occurs in such abundance as to deserve the name of a petrified forest. It is located in northern Arizona south of the town of Adamana on the Santa Fe railroad and was designated as a national monument in 1906.

There are three principal groups of forests in which trees or blocks of the petrified wood lie scattered about in profusion. Many tree trunks exceed 100 feet in length and cross sections reveal the fact that these trees, which are cedars, did not grow there, but upon falling became water logged on the bottom at this point. During decomposition the cell structure of the wood was entirely replaced by silica derived from sandstone in the surrounding land.

The state of mineralization in which much of the wood exists almost places it with gems or precious stones. Not only are chalcedony, opals and agates found but many trees approach the condition of jasper and onyx.

Spherical Tanks for Oil

Spherical tanks in which volatile oil can be stored with a minimum of evaporation have been built in Oklahoma.

No Escape

He who pays coal bills in winter and ice bills in summer is a firm believer in the theory that riches have wings.

Community Letter Boxes

Twenty-eight mail boxes on one tree is the record held by a small community near a large city in the East.

The Personal Side

Mrs. M. M. Roth of Fallowfield avenue is a caller in Pittsburgh today.

James O'Brien of North Charleroi, was a business caller in Pittsburgh yesterday.

Michael Rosenbloom of Fallowfield avenue was a business caller in Pittsburgh yesterday.

Mr. and Mrs. Frank Fries and son of Orville, Ohio, are visiting with relatives in Charleroi this week.

M. C. Donovan of New York City, is visiting at the home of Mrs. Sarah W. Fellows of Fallowfield avenue for a few days.

Miss Queen Wilson of Fallowfield avenue and Ralph White of Monongahela, spent yesterday visiting in Pittsburgh.

Mrs. Leonard Brand and children of First street, are guests at the home of Mrs. Brand's sister, Mrs. P. J. Brand of Atlantic this week.

William Guiler, son of Mr. and Mrs. William Guiler of Fallowfield avenue, has returned home from St. Vincent's College, Greensburg, Pa., for his summer vacation.

Mrs. E. H. Bradley of Fallowfield avenue, and Mr. and Mrs. C. A. Fisher of Washington avenue, motored to Pittsburgh yesterday, where they spent the day attending to business matters.

Mrs. John B. Schafer and daughter, Florence of McKean avenue left yesterday afternoon to spend the following week with Mrs. Schafer's sister, Miss Rose Klein of Mt. Lebanon, Pittsburgh.

Mrs. Edward Reardon and son, Herman of Third street left this morning for Woodlawn, where they will visit with Mrs. Reardon's daughter, Mrs. J. J. Wall of that place for a week.

Mrs. A. S. Sickman of North Charleroi, who underwent an operation yesterday morning at 1 o'clock in the West Penn hospital, Pittsburgh, is reported today as getting along as well as can be expected.

Mrs. William F. Ludwig of Fallowfield avenue, left this morning to spend the balance of the week visiting with Mr. and Mrs. Fred Myers of Ouz City. She was accompanied as far as Pittsburgh by her daughter, Miss Nelle Ludwig.

Mr. and Mrs. Walter T. Bromwich of 724 Fallowfield avenue left Monday for Cleveland, Ohio, where yesterday morning, Mrs. Bromwich reported at the clinic of the Lakeside hospital of that place, to undergo an examination, treatment and possibly an operation.

Mrs. Joseph Brown of Vestaburg has returned to her home after a short visit with her son and wife, Mr. and Mrs. George T. Brown of Seventh street. She was accompanied home by her grandson, Francis Brown, who will visit in Vestaburg for the following week.

Mrs. Frank H. Welsh returned to her home in Lookout avenue yesterday afternoon, after spending the past few days visiting with friends in Pittsburgh and Coraopolis. Miss Mary Welsh, a daughter, met her mother in Pittsburgh yesterday and after spending a few hours there accompanied her home.

Mr. and Mrs. C. A. Fisher of Washington avenue were in attendance at the beautiful church wedding of Miss Margaret Murphy and Lawrence Doplin, which took place this morning in the church of Transfiguration of Monongahela. They also attended the breakfast which followed the ceremony, at the home of the bride's parents.

BAIL REFUSED IN
THE LILLY INCIDENT

Ebensburg, Pa. June 18.—Eighteen members of the Ku Klux Klan and thirteen citizens of Lilly convicted of affray and unlawful assemblage will not be admitted to bail pending a motion for a new trial, Judge Thomas D. Finletter of Philadelphia, specially presiding announced last night. William Monahan, of Lilly, aged 18, had just been acquitted of murder, the charge growing out of the Lilly riot of April 5, when the motion for bail was filed and promptly refused. Samuel Evans, alleged Klansman, also was acquitted of the murder charge and similar charges against twenty-nine others were continued until the September term of court, on motion of Finletter. Judge Finletter will return to Ebensburg July 1 to hear arguments for new trials in the cases where convictions were secured.

OF THE MAIL

In Society's Realm

Members of the St. Mary's Social Union of St. Mary's Episcopal church and all other men of the church are requested to meet in the Borough building tomorrow evening at 7:30 with Walter H. Fielding. The meeting is an important one and all are asked to turn out for it.

The members of the Sewing Circle of the Washington Avenue Presbyterian church held their regular meeting yesterday in the form of a picnic at Oakland Park. The majority of the members and their families left Charleroi on the 3:40 car and spent a delightful evening in games and various entertaining sports. There were approximately 55 present. A basket luncheon was enjoyed at 6 o'clock.

The Home and Foreign Missionary society of Christ Lutheran church met at the home of Mrs. Robert Coulter with eight members present and one visitor. Rev. Dr. C. B. King. Mrs. King led in the devotional exercises, as well as during the study hour, at which time a chapter of the book, "The Church and the Child" was well discussed. The serving of luncheon followed the delightful evening.

Misses Eva and Anna King were hostesses last night to the regular meeting of the Athena club of Roscoe at their home in that borough. A program of games was enjoyed and Misses Jessie Forsythe and Kathryn Gibson, who were on the entertainment committee, presented a clever Punch and Judy show, which was well received. Piano and violin solos were rendered by Misses Margaret Cairns and Kathryn Gibson. With the close of the delightful evening, the hostesses served a dainty luncheon. Miss Helen Booth of North Charleroi was a visiting guest present.

At high noon Monday, in the Lutheran church of Berlin, Pa., Miss Lillian Hammond Latchford, daughter of Mr. and Mrs. Hugh Latchford of Bradenville, became the bride of Harry B. Worthington, son of Mr. and Mrs. D. F. Worthington of 215 Lookout avenue, with the Rev. C. P. Bastian, pastor of the church, and formerly of this place, officiating. The bride was attended by Miss Stella Ray of Bradenville, while the groom's attendant was Orval P. Campbell of Latrobe. Immediately following the wedding ceremony, the bridal party were served a luncheon at the home of the Rev. and Mrs. C. P. Bastian, after which Mr. and Mrs. Worthington left on a two weeks' eastern wedding tour. After July 1st, the couple will be at home to their many friends at their newly furnished apartment in Charleroi.

Mrs. Anna Kopnick of Lincoln avenue announces the marriage of her granddaughter, Miss Mary Pivovarnik, daughter of Mr. and Mrs. Andy Pivovarnik, of Latrobe, to Joseph Horvat, son of Mr. and Mrs. Joseph Horvat of Masontown, which took place in St. Cecilia's church, Latrobe, Monday, June 16. The ceremony which was performed before a large number of relatives and friends of the contracting parties, was read by Rev. Father Xavier of Latrobe. The bride was beautifully attired in a gown of white canton crepe with bead trimming and her silk veil was held in place by a wreath of orange blossoms. She carried a bouquet of white roses and was attended by Miss Julia Kopnick of Charleroi and her sister, Miss Anna of Latrobe. Both attendants appeared in pink satin with head bands of seed pearls. Joseph Kolasky of Charleroi and Stephen Kostier of Latrobe served as the groom's attendant. The bride has been a resident of Charleroi for the past six years and is very well known here. Those from Charleroi who witnessed the ceremony were Mrs. Anna Kopnick, Mr. and Mrs. Paul Valovich and Mr. and Mrs. Charles Skapik.

ACCOUNT FOR

16 OF THE 17

London, June 18.—Sixteen of the 17 contestants in this year's Gordon Bennett cup race for balloons have been accounted for.

The seventeenth, the famous Belgian pilot Demuyter, who won the race in 1922 and 1923, was reported to have landed at Brussels.

Demuyter, piloting the balloon Belgica, was anxious to win this year, to obtain permanent possession of the trophy. If he did land near Brighton, the race apparently was won by the Frenchman La Forte, who covered slightly more than 200 miles.

TESTS TO BE GIVEN

RADIO TELEGRAPH

Extensive tests, to determine the availability of the radio telegraph for transmitting railroad messages (other than train orders) in the event of extensive prostration of the wire systems, have just been conducted through cooperation between members of the American Radio Relay League, operating under Federal Licenses, and the Pennsylvania Railroad System Management.

The tests, which covered the principal operating points on the Pennsylvania Railroad System between the Atlantic Seaboard on the east and the Mississippi River on the west, proved in the main highly successful, and in the opinion of the railroad management, demonstrate that the service of the radio telegraph stations embraced in the League offers a practical means of emergency communication.

Before commencing the series of tests, conferences were held at Philadelphia between A. L. Budlong of Hartford, Conn., officially representing the American Radio Relay League, J. C. Johnson, General Superintendent of Telegraph of the Pennsylvania Railroad System and the Superintendent of Telegraph and Signals of each of the four Regions in the System, namely, J. D. Jones, of Philadelphia, Eastern Region; W. M. Post of Pittsburgh, Central Region; C. W. Hixson, of Chicago, Northwestern Region; and E. B. Fry of St. Louis, Southwestern Region. In these conferences the methods of operating and the general plan for dispatching messages and receiving replies were agreed upon.

TO SURVEY NEEDS
OF UNIVERSITY

Philadelphia, June 18.—A complete survey of the needs of the University of Pennsylvania is being made by a committee of trustees and every necessity is to be made this month, the board of trustees has announced. This will be the first time the needs of the university have ever been scientifically investigated as a whole. The report is to be compiled incidentally to launching the university's endowment campaign and the extent of the endowment asked is to be based on the report.

WEIRD TALE OF A MOVIE MURDER NEW SENSATION

Los Angeles, June 18. — A weird tale told by a prisoner sentenced to San Quentin penitentiary has set the police of Los Angeles searching on what may be the trail of a new movie murder, involving beautiful Barbara LaMarr as one of the principals, or maybe only the ravings of a publicity seeker.

Thus far the police have a fairly complete story of the reported crime, but no corpse or other evidence of its having been committed.

Four weeks ago, a certain actor styling himself Count Mario Escobar, who had found indifferent success in his striving for film fame, disappeared from Hollywood.

Nothing was thought of this until Morris Nodler, prisoner in the county jail and under sentence for highway robbery, claimed to have knowledge that the count was murdered and to know the spot along the lonely cliffs at San Capistrano, where the nobleman's body was hurled over into the sea. To make his story good, he declared the count had been murdered in a fight over Barbara LaMarr.

Mesopotamia

In the early history of the world, Mesopotamia was an important, populous country. Certain small parts are naturally fertile, while the more arid regions were made to produce by good systems of irrigation. As the land of the country declined these systems fell into disuse and the country became more and more of a desert.

Large Family in Fifty Years

Every human being has 16 ancestors in the fourth generation back, 32 in the fifth, almost 1,000,000 in the twentieth; nearly 1,000,000,000 in the thirtieth. The whole number of one's ancestors in the fiftieth generation is 5,362,794,914,214,048, a vast multitude which is impossible to contemplate.

We Can Trust the Family

A scientist says that, within a few years, we should be able to tune in with the movie theaters and see the latest films without leaving our homes. But the thing will hardly seem natural without the man behind us, to read the subtitles.—Marion Star.

Frog as a Barometer

A barometer in common use in some parts of Europe consists of a pan of water and a frog and a little stepladder in it. When the frog comes out of the water and sits on the steps it is said infallibly to indicate rain.

Paint Antedates Agriculture

Paint has played a major role in man's life for 25,000 years. Men of the Stone Age decorated their caves with it long before agriculture was thought of or metals discovered. These paintings still endure.

Speed Makes Plane Fly

An airplane must attain a speed of about 40 miles an hour while taxiing over the ground before it can fly, and unless it is maintained at a speed in excess of 40 miles an hour the machine will fall.

Mount Kilimanjaro

Mount Kilimanjaro, in Tanganyika territory, Africa, is 19,966 feet high the highest mountain on that continent. It is near the equator and is covered a third way down with perpetual snow.

No Hope for Pedestrians

Magazine writers are telling how fear may be overcome, but even after reading their articles pedestrians will still have the shivers when in the midst of the raging drivers.—Boston Transcript.

Oldest Piece of Furniture

The throne of the Egyptian Queen Hetshespa, which is in the British museum, is the oldest piece of furniture in the world. Many pieces of furniture extant date back 8,000 years.

Only Walled U. S. City

Tucson, Arizona, has the distinction of being the only walled city in the United States. This wall, which at one time encircled the entire city, has long since fallen into decay.

Strength of Human Bones

The bones of a human being will bear three times as great a pressure as oak and nearly as much as wrought iron, without being crushed.

Where Credit Belongs

An enthusiast thinks he should have all the credit for a successful idea, though the practical plodder may be responsible for its success.

Works Either Way

If a predatory nature has clever brains it swindles the public; if it hasn't it holds the public up with a pistol on dark streets.

Always the Way

Curious fact about leisure is that one forgets all about the grudges he couldn't cradle when he was so busy he didn't have time.

Sometimes

Remember, young folks, when you buy household furniture, that it is probably going to be with you for a lifetime.

Willing to Pay

It takes money to make money, of course; but if you have smartness, people will come to you with their money.

TO OPEN THE GROUNDS SOON

Monday morning, June 23, will mark the opening of Westminster and Hillcrest playgrounds for the boys and girls of Monongahela.

Westminster Park playgrounds are located in the second ward of the city in allusion, and are near Jackson street; the Hillcrest Park playgrounds are in the First ward, in East Main street, Monongahela.

This week City Engineer Mark Bolland is placing equipment, consisting of swings, seesaws, giant strides, and like equipment in both of the municipal playgrounds. The long rainy spring has prevented several important plans being carried out. Miss Mary Shank, who will have the supervision of the playground activities this summer, is well known to the boys and girls as she was the popular Lincoln school playground leader last year. She will be play-leader at Westminster this summer, while Miss Ethel Watson will have charge of Hillcrest. Both leaders have had several years' experience in this work.

WOMAN TAKES

SILK DRESSES

(Continued from First Page)
The previous the accused took the dresses and put them in a grip or satchel. She would be punished if she did not buy, and it is said that the women walked out of the establishment. At this time the proprietor demanded to see what they had in the grip, and asked them to walk back into the store. This they did. On opening the satchel or grip, the dresses were found. One of the garments is said to have been of distinct coloring, and it being missed, made the storekeeper suspicious. The police were then called, and the arrest followed. The accused could give no explanation of why she did it.

SMUTS LOSES

IN ELECTIONS

Capitown, June 18.—General Jan C. Smuts, former prime minister of South Africa, has been defeated in the parliamentary elections held yesterday.

Incomplete returns today showed the composition of the new parliament will be approximately as follows:

South African party, 25; Labor, 18; Nationalists, 12.

Majority of the old parliament was wiped out with General Smuts.

Had Guest Puzzled

An English nobleman bought one of the old historic coaching taverns. It was fitted with relics and he announced his intention of operating it both as a museum and as an inn. But the first customer in gave him a rude jar. This man had been served with an ancient slice of cheese between two moist slices of bread. Whereupon he called for the proprietor and asked: "Is this a sandwich or an antique?"

Where She Figured

The children of the Pittman family were according to their respective accounts, all first in something at school. Tommy was first in reading. Alice was first in arithmetic. Sammy in sports and so on. Janet alone remained silent.

"Well, Janet, how about you?" her uncle asked. "Aren't you first in anything?"

"I am," said Janet. "I am first out of the building when the bell rings."

Allmetal Weatherstrip
